

ALEXANDROS ZACHAROPOULOS

IT Support • Python & Web Development • Networking

Chalkida, Greece | +30 6981868758 | alexzaxa70@gmail.com

PROFESSIONAL PROFILE

Early-career IT professional with hands-on experience in IT support, networking, Windows/Linux systems, and application development. Particularly interested in Python, web development, automation, and network infrastructure, and have built personal projects that combine software, databases, networking, and automation. Analytical thinker, quick to learn, and comfortable adapting to different technical needs. Open to both software development roles and IT support, systems, or networking positions.

TECHNICAL SKILLS

Programming & Web: Python, HTML, CSS, JavaScript, Flask, REST APIs, responsive web applications

Networking: LAN design, TCP/IP, NAT, port forwarding, DNS, VM networking, network security fundamentals

Systems: Windows 11, Linux, system administration, user management, Active Directory, virtualization

Development & Tools: Git/GitHub, VS Code, Visual Studio, API integration, databases, automation

Cybersecurity: Kali Linux, penetration-testing fundamentals, vulnerability assessment, security awareness

AI & Automation: Python automation, data processing, AI/ML fundamentals, workflow automation

PROFESSIONAL EXPERIENCE

IT / Technical Support — Halcor | Internship / Work experience

Supported day-to-day IT issues and provided technical troubleshooting.

Gained familiarity with computer systems, networks, and IT environment processes.

Built practical experience resolving technical problems and supporting end users.

Sales / Customer Service | Professional experience

Customer service, communication, and understanding customer needs.

Reliability, consistency, and adaptability in a fast-paced professional environment.

PERSONAL & TECHNICAL PROJECTS

AlexZaxa Solutions: Design and development of professional websites for local businesses, with a focus on responsive design, a mobile-first experience, and a modern web stack.

Restaurant PDA / Order Management: Built an order-taking application with waiter/PDA functionality, order management, a delivery workflow, kitchen printing, and data management.

Home Lab & Infrastructure: Hands-on work with Windows Server, Active Directory, Linux servers, virtualization, Docker, monitoring, DNS, and secure remote access.

EDUCATION & TRAINING

Oinofyta / Schimatari Vocational High School (EPAL) — Informatics

Certification / training in Networking

Microsoft Applied Skills — Active Directory, Azure, and GitHub Copilot

Seminars / hands-on practice in Kali Linux, CTF challenges, and cybersecurity fundamentals

LANGUAGES

Greek — Native language

English — C2 / Proficiency (Michigan & LRN)

CAREER OBJECTIVE

Looking for an opportunity in IT, with a preference for IT Support, Network/System Administration, Web Development, or Python development. Open to taking on a range of technical responsibilities, learning new tools, and growing within a professional environment.
